

We are pleased to introduce our companies, FilterBoxx™ and FilterBoxx™ International Inc. As a Canadian company headquartered in Edmonton, Alberta, we are actively seeking opportunities in instances where Water Treatment (reverse osmosis, de-salination, etc.) and Waste Water Treatment is a concern. Along with conventional biological and physical chemical solutions, Filterboxx™ offers the most advanced Membrane Technology in the industry.

FilterBoxx™ produces water and wastewater treatment solutions meeting the highest standards of quality utilizing industrial grade components and with a track record of success. Whether at construction campsites or permanent locations, our FilterBoxx™ treatment systems are designed to meet the specific needs of the client. Our systems are modular and sizes are available to treat a wide range of flows and influent characteristics. Our camp water and treatment units are specifically designed to meet the needs and challenges of the camp environment. We also offer both biological treatment featuring activated sludge/extended aeration processes as well as FilterBoxx' own P/C process.

FilterBoxx™ utilizes state of the art electrical and control systems for all our treatment systems. Every FilterBoxx™ treatment system includes comprehensive monitoring instrumentation to assist in process control and ensure that effluent will consistently meet regulatory requirements.

Along with our comprehensive website www.filterboxx.com, I am also providing additional information for your perusal and would request being added to your list of suppliers and/or sub-contractors. A partial list of clients, from 50 man to 1000+ man camps include the following:

- EnCana - Various locations
- Burlington/Canadian Hunter
- Petro Canada
- Travco PTI - Various projects
- Nabors Drilling
- Canada/US camp in Kabul, Afghanistan – Left via Hercules commissioned & running as of August 8, 2003. Results have exceeded all military expectations.
- Various coal methane produced water projects – 100,000 barrels per day
- BP Chevron Arctic JV – minus 63F waste water suitable to blow in tundra, Net savings \$18,000 per day for water delivery and removal
- EnCana /Akita Drilling – minus 60F Waste Water Treatment Plant – High Arctic

Industries that FilterBoxx™ services include:

- Drilling/Construction Camps
- Mining
- Resorts and Hotels
- Foods & Beverage
- Hospitals
- New Subdivision Developments
- Small Municipalities

With FilterBoxx' specifically designed packaged water treatment solutions, we ensure in meeting and exceeding environmental standards and we guarantee performance. We engineer, design, and manufacture our units out of 304-grade stainless steel for long life and the ability to handle harsh climates. We offer **sales, rentals and leasing options.**

We look forward for the opportunity to discuss and provide you with more information on how a FilterBoxx™ treatment solution can meet your needs. Thank you.

Sincerely,

D. Boyd Evans
